### Powerfully-Organized Trench System Taken After Violent Attack

Petain Comes Back At Germans And Makes Inroad To A Depth Of More Than 300 Yards On 800 Yards Front—French Consolidate Positions And Repel Counter Attacks—Russians Suffer Heavily In Onslaught At Chemin-des-Dames—Russians Drive Austrians From Positions.

(By Morning Bulletin Leased Wire)  
LONDON, July 15.—With somewhat of a slackening of the Russian offensive in Galicia, owing to the bad weather, the French and Germans along Chemin-des-Dames and in Champagne have come together in mighty struggles in which the advantage rested mainly with the forces of General Petain.

In Champagne, to the north of Mont Haut and northeast of the Teton, the French in a violent attack captured powerfully organized German trench elements on a front of more than 800 yards and to a depth of more than 300 yards and consolidated the positions despite heavy counter attacks in which the Germans suffered heavy casualties and lost in addition 360 men made prisoner.

Another Terrific Struggle.  
Along the Chemin-des-Dames the Germans, west of Cerny, Saturday night, after heavy artillery preparation, threw heavy forces against the French line. The battle waged back and forth throughout the night, but although the Germans broke through the French line at several points, daylight saw them completely evicted except from front line trenches about 500 yards in length. The Berlin war office claims the capture of 350 prisoners in the fighting.

In Flanders at various points the British and Germans continue to carry out intensive artillery duels, and the British to make successful raids on German positions.

Russian Successes.  
Although rain and swollen streams are militating against the fast prosecution of the Russian offensive in Galicia, the troops of General Brusiloff nevertheless have driven the Austrians from positions southwest of Kalusz and taken more than a thousand prisoners and a number of guns. Apparently the Austro-German lines are stiffening as the result of the arrival of reinforcements, for Petrograd records the repulse of attacks along the Dobrodynia-Novica front and says that the enemy has gone on the offensive along the Lomnica river near Pereshino and is stubbornly resisting the Russians on the Sivilskan sector.

There has been little activity on any of the other fronts although the Russians near Van, in Turkish Armenia, have driven the Turks from several positions.

It is not improbable that Rumania again may soon become an important theatre in the war as the Berlin official communication announces that an increase in the artillery activity at various points is noticeable.

Russian Prisoners.  
PETROGRAD, July 15.—Attacks yesterday by Russian troops in the Galician region southwest of Kalusz, eastern Galicia, resulted in the Austrians losing their positions, 1,000 men in prisoners, and a number of guns, the war office announced today.

Elsewhere the Russians held their ground against attacks and took more than 400 additional prisoners.

In consequence of heavy rains the rivers, the Dniester and others are rapidly rising and the mud which runs into them will soon turn into rivers and cause the roads in their neighborhood to be inundated.

British Planes Ace.  
LONDON, July 15.—The official communication issued tonight says:

"Our own and the enemy's artillery was active today in the neighborhood of Arras, Ypres, and Neuport."

"Friday night our airplanes bombed four important railway stations behind the enemy's lines and a large German camp. Yesterday, despite heavy thunderstorms throughout the day, bombs were dropped on hostile air-dromes and in enemy ammunition dumps. Much valuable work was done in co-operation with the artillery."

"In the air fighting three German machines were downed and two others were driven down out of control. Five of our machines are missing."

CONTRABAND IN OIL TANK.  
NEW YORK, July 14.—A United States destroyer today destroyed a contraband oil tank, which was overloaded and brought back to this port today the Norwegian steamship Conrad Mohr, aboard which a large quantity of oil was seized.

The contraband of war, found secreted in an oil tank. The captain and his chief engineer were arrested on a charge of conspiracy to defraud the government by filing a false manifest.

HARVEST LABOR IS ASSURED BY CO-OPERATION.  
Arrangements Being Made Between The Governments Of Canada And U. S.

(By Morning Bulletin Leased Wire)  
WINNIPEG, July 14.—The Ottawa correspondent of the Winnipeg Telegram writes:

"Co-operation between the governments of Canada and the United States has been arranged to secure the necessary labor to harvest the western crops. When Sir George Foster was in Washington the scheme was broached and in the meantime details have been worked out. They were approved by an order in council today. Similar action has been taken at Washington."

"The plan is that farm laborers, after harvesting crops on the American side, where the season is earlier, should move across the line to successive districts as the crops mature, for harvest. A conference was held today with transportation interests employing large numbers of men. The companies agree to release all that can be spared to help on the farms and to provide cheap and expeditious transportation. About 20,000 laborers will be needed and special arrangements have to be made this year because, differing from last season, a much smaller number of soldiers will be available for the work. American laborers are expected to be secured to such an extent as will thereby assure the crop saving."

NO JAPS FOR RUSSIA.  
TOKYO, June 29. (By mail).—Answering a question at a meeting of the late Viscount Motono characterized as untrue the report that Japan intended to dispatch troops to Russia.

RUPTURE IMMINENT.  
BUENOS AYRES, July 15.—There is a persistent report that a rupture between Argentina and Germany is imminent. Germany is further reported, has refused satisfaction for the torpedoing of the Argentine steamer Tor, which has been the subject of official investigation.

HUNGARIAN CABINET.  
BUDAPEST, July 15.—According to a Berlin dispatch received here the house of the Hungarian parliament after two days' discussion adopted a bill for the provisional extension of the cabinet by the appointment of additional ministers.

### PREPARING WAY FOR QUICK MOVE FROM COAL CITY

Col. Rexford Contradicts A Statement Of Alphonse Verville.

### ATTACK NOW FIERCE ARTILLERY DUELS

Canadians Thoroughly Proficient By Counter-Battery-Work.

(By Canadian Overseas Correspondent)  
CANADIAN HEADQUARTERS IN FRANCE, Sunday, July 15, via London.—Early on Saturday morning seven loud explosions were heard in Lens and when day broke a great cloud of smoke still hung above the city. The explosions were not caused by our artillery, and must have been the work of the enemy. No fire of our guns was due to the blowing up of the overhead machinery of Mine Number 13, hitherto one of the most conspicuous features of the landscape in the east end of Lens. The enemy has been unable to raise coal from this mine because of the constant shell fire to which it has been subjected lately.

May Quit In A Hurry.  
Fearing that he might have to evacuate in a hurry some day he has now thoroughly destroyed the mine, while there was yet time to do so. The mine machinery now lies in a tangled, fantastic ruin, where it was thrown by the explosion.

Our attack upon Lens has resolved itself into a fierce and long continued artillery duel. The enemy has added greatly to the number of his active batteries. Our guns have no leisure in outflanking the great concentration and preventing the enemy from "shooting up" our infantry positions, which are now scattered about in various directions forming suburbs of Lens, instead of out of the open plain, as during the period of our advance toward the city.

Artillery Efficient.  
The Canadian artillery has become thoroughly proficient by much practice in counter-battery work. The result of twenty-four hours' operations was thus officially described in yesterday's report: "Out of many shoals with airplane observation, the enemy's positions were so much damaged that the individual gun pits are no longer distinguishable. Nine other pits were hit, and three were destroyed. A few explosions were caused and one fire, which lasted 17 minutes."

That is the terse official report of one day's work among the many. The experiences of the German gunners who sometimes attempt to keep their guns in action amid the fiercest death falling around them must be highly undesirable.

HUDSON'S BAY CO. WINS APPEAL.  
Saskatchewan Sales-Of-Liquor Act Ultra Vires In Its Case.

(By Morning Bulletin Leased Wire)  
REGINA, July 14.—That it is now legal for the Hudson's Bay company and Goldslee Limited to sell liquor outside the province is the interpretation placed by lawyers on the judgment handed down today by the court in Regina.

The Hudson's Bay company also made application for a writ of prohibition against their case being tried in the province of Saskatchewan. The judgment granted the writ of prohibition and declared the act to be ultra vires.

LINER ASHORE; PEOPLE SAFE.  
ST. JOHN'S, Nfld., July 15.—The Norwegian-American liner, Kristianiafjord, 10,646 gross tonnage, carrying 1,200 passengers, went ashore today near Cape Race, the southernmost point of Newfoundland. All passengers were landed safely at Port of Spain, and the ship was towed to the wharf.

Several other minor government bills were put through committee stage and given third reading, including the bill to amend the Interest Act. It provides that in future in Manitoba interest on judgments will be five per cent. This will make it the same as the other provinces in the west. The house then went into supply on railway estimates. Apparently consideration of the military service bill will not be resumed today.

HON. MR. OLIVER ASKS COMMONS TO HURRY REPORT.  
W. F. O'Connor's Findings in the Cost of Living Inquiry, is Topic.

Ottawa, July 14.—Hon. Frank Oliver in the Commons this afternoon asked the government to expedite the printing of the report of W. F. O'Connor, commissioner of the cost of living, on goods in cold storage warehouses. He said that an interesting discussion had arisen in the press regarding the matter and it was desirable that members should have the report as soon as possible.

The house then went into committee on Hon. J. D. Hazen's bill to amend the Fisheries Act. Its chief provision is to change the name of dogfish to gray fish. The bill was reported.

### CROWD MOBBS SOLDIERS AT MONTREAL

Col. Rexford Contradicts A Statement Of Alphonse Verville.

### ESCORTED TO CAR LINE BY THE MAYOR

Meeting Adopts Resolution Appealing To Imperial Government.

(By Morning Bulletin Leased Wire)  
MONTREAL, July 15.—Lieut. Colonel R. P. Rexford, formerly officer commanding the 8th Guards Overseas Battalion, and a soldier of a Highland reinforcing company, narrowly escaped maltreatment at the hands of a mob of about 5,000 persons on Pte. St. Charles this afternoon, when, during the progress of an anti-conscription meeting called by Mederic Martin, M. P., Colonel Rexford shouted contradiction of a statement made by Alphonse Verville, the Liberal M. P.

The meeting was well attended, there being about 15,000 persons packed around the speaker's platform when the speeches were at their height. The principal speakers were Mederic Martin and Mr. Verville.

Exciting Climax.  
The exciting climax to the meeting came while Mr. Verville was denouncing the government's sponsorship of the Military Service bill. Mr. Verville, speaking in French, declared that there are many Canadian soldiers in England who are kept there to prevent their physical condition becoming known to the people in Canada.

Colonel Rexford shouted in English: "Immediately the crowd broke up, although only a comparatively small number could have heard the denunciation and hundreds of the Highlanders dashed towards the speaker's platform."

Colonel Rexford was in the midst of his speech when the mob broke up. He was escorted to the car by the police, who urged them to leave the vicinity for their own safety.

Mayor Martin, who had been present, pointed out the mob to the people. About 5,000 persons followed them to the car line, when they boarded the car, stones were thrown and the car windows broken.

Both trucks and cars were damaged. During the walk of 150 yards to the street car line both the colonel and the uniformed soldier were struck, and Colonel Rexford pointed out one of the assailants. The police escorted him to the car, but he refused to get in.

### RLY. POLICY OF GOVERNMENT TO BE DEFINED

Before End Of Session Says Hon. Frank Cochrane.

### DRAYTON-ACKWORTH INQUIRY REPORT

Removal Of Jasper Park Coal Mines' Spur Line.

(By Morning Bulletin Leased Wire)  
OTTAWA, July 15.—That a definite announcement in regard to the railway policy of the government, following the report of the Drayton-Ackworth commission, will be made before the end of the session, was the announcement made in parliament on Saturday afternoon by Hon. Frank Cochrane, when railway supplies were being considered in committee.

Interest on Bonds.  
E. M. MacDonald asked if any steps had been taken by the government to provide for the interest on certain railway bonds which fell due on June 30, and which everybody knew had not been met.

Mr. Cochrane, answering E. M. MacDonald, stated that insofar as the Grand Trunk Pacific is concerned, he understood that the interest had been paid out of last year's vote by parliament. As to the C. N. R., he could not say.

Hon. Frank Oliver said that he desired to commend Sir Henry Drayton, the chairman of the commission of inquiry, for his generous action in resigning the post of chairman of the commission.

Mr. Cochrane said he appreciated what had been said by the member for Edmonton. He had already expressed the gratitude of the government and his own gratitude in a letter addressed to Sir Henry Drayton.

Mr. Cochrane succeeded as to the importance of the question, the vote should be allowed to stand until a government had made its statement.

Mr. Oliver, who was leading the opposition, said that he was prepared to take the promise of the minister that the government would make a full statement before the session closes, and the vote was allowed to pass.

Hudson Bay Railway.  
Hon. Frank Cochrane stated in reply to Mr. German that work on the Hudson Bay railway would not be proceeded with until after the war.

Mr. German protested against this. He said that the Hudson Bay Railway construction, involving an expenditure of millions, was being proceeded with and the work was finished would not be of much use.

Hon. Frank Oliver did not agree with Mr. German. He said the work on the Hudson Bay Railway was so advanced that it would be inadvisable to discontinue at the present time. It was necessary that the rails should be laid to tidewater, he said.

Jasper Park Mines.  
Hon. Frank Oliver referred to the situation at the Jasper Park coal mines, west of Edmonton, arising out of the removal of Grand Trunk rails.

He said that a spur line which had been built for the mines, which put the mining companies at a disadvantage in regard to shipments of coal and asked if the government would recognize the right of the companies to compensation.

Mr. Cochrane said that such rights would be recognized by the government.

There was a discussion between Mr. Oliver and Mr. Cochrane on the question of grain movement and Mr. Oliver regretted that so much of our crop went to the United States.

Mr. Cochrane said that in normal times it was difficult for the railways to compete with the water rates. The city of Quebec was as well as Montreal to handle large quantities of grain. When the war was over and we could handle the expenditure, we might undertake it.

WATTERS ASSERTS ORGANIZED LABOR WILL OPPOSE ACT.  
Even By Dominion-Wide Strike If Wealth Is Not Conscripted.

(By Morning Bulletin Leased Wire)  
OTTAWA, July 15.—J. C. Watters, president of the Dominion Trades and Labor congress, in a speech at Hull, Que., tonight attacked Sir Robert Borden, the premier, who he declared had been guilty of a breach of faith in not consulting organized labor before bringing in conscription. He also asserted that organized labor throughout Canada would oppose the measure, even by Dominion-wide strike, if necessary, unless the government showed its faith in taking over the industries and devoting them to the needs of the empire.

AMERICAN SAILING SHIP SINKS SUB.  
(By Morning Bulletin Leased Wire)  
AN ATLANTIC PORT, July 15.—A submarine was sunk by an American schooner which sailed from this port for a European port, according to a dispatch received here by the owners of the vessel from its captain. The naval gun crew aboard the schooner was composed of six gunners and a petty officer. No details of the fight were given in the dispatch.

"WORLD HATES GERMANY."  
ZURICH, July 15.—The Austrian Reichsrath was thrown into an uproar on Saturday when the former Czech minister, Herr Frischek, declared the hate of the entire world was not directed against Austria but against Germany, and that Austria should detach herself from her ally, says a Vienna dispatch.

### Political Turmoil in Germany Culminates In Hollweg Quitting

Attributed To The Old Hostility Of Crown Prince And Heir's Notorious Dislike For Political Reform—Successor Is Bureau Chief Of Old Type—Grown Grey In Prussian Civil Service—Victory Of Reactionaries—Some Papers Claiming For Joint Dictatorship Of Hindenburg And Ludendorff.

(By Morning Bulletin Leased Wire)  
LONDON, July 14.—(British Admiralty per Wireless Press)—Dr. von Bethmann-Hollweg, the German imperial chancellor, has resigned.

Dr. George Michaelis, Prussian under-secretary of finance and food commissioner, has been appointed to succeed Dr. von Bethmann-Hollweg.

LONDON, July 15.—The political turmoil which has been convulsing Germany ever since Russia's first starting success upon the resumption of her offensive has culminated for the present in the resignation of the imperial chancellor, Dr. von Bethmann-Hollweg.

The resignation of the chancellor, seemed to have triumphed over his opponents who have been clamoring for his head, by making concessions which were tantamount to the formation of a kind of imperial coalition ministry.

At the same time the chancellor, by the declaration that Germany was defensively fighting for the freedom of her territorial possessions, evolved a formula that seemed satisfactory to both those who clamored for peace by agreement and those who demanded repudiation of the formula "No annexations and no indemnities." In all this Dr. von Bethmann-Hollweg was strongly backed by the emperor.

The advent of the crown prince on the scene—announced by his father to share the deliberations regarding the future of the dynasty—seems to have changed entirely the position with regard to the imperial chancellor. The crown prince is now a leading part in the discussions and

his ancient hostility toward Dr. von Bethmann-Hollweg, coupled with his notorious dislike for political reform undoubtedly precipitated the chancellor's resignation.

The fact that Field Marshal von Hindenburg, chief of staff, and General von Ludendorff, first quarter master general, have been most prominent through these discussions and that a section of the press has been clamoring for a joint dictatorship by them hardly augurs well for the realization of the Prussian franchise reform which the emperor has just decreed, or for the movement toward a diminution of Germany's war aims and therefore, toward peace, on which the Austrian emperor has been doing his utmost to persuade the German emperor to embark.

The Bavarian ministers have been the most active in these Berlin confabulations and the fact that the Centre Catholic party has rallied to the peace gospel preached by Mathia Erbsberger, directly on his return from Vienna, where he was appointed emperor's plenipotentiary, shows that the emperor is backed in his determination to secure peace by at least one and that the most powerful of the state in the German empire.

Whether southern German states will join in which appears to be a movement to secure the renunciation of Prussian hegemony, events in no distant future probably will show.

Dr. von Bethmann-Hollweg's successor, Dr. George Michaelis, is a bureau chief of the old type, whose appointment can scarcely be regarded as promising much in the direction of the parliamentaryization of Germany. Michaelis served in the civil service in 1870 at the age of 22, he followed the customary placid career of Prussian officials, holding various posts until he was appointed under secretary in the finance ministry in 1909.

In February, 1917, he received the additional appointment of Prussian food commissioner. The only break in this monotonous routine up to 1917 was a period of four years which he spent as a lecturer in the German law school there.

FAIR WILL NOT COST THE CITY A SINGLE CENT.  
Exhibition Company Successfully Finances Enterprise For Third Year Of War.

All that Manager Stark could say last night regarding the financial showing for the exhibition, which has been gates Saturday evening after a successful day, was that the week as has been recorded in all its history, was that the fair would not cost the city of Edmonton a cent.

The exhibition, which has been successfully financed through the year, it has through all the three years of the war, which is a record believed to have been unequalled in Canada and achieved by no other fair. Up to the returns are in and have been checked up the management decline to make any exact statement in dollar and cents but it is understood that the fair ended on the right side of the ledger.

For instance, Mr. Stark said that the automobile races had resulted in the acquisition of 15,000 dollars to the Exhibition association, in clear cash, and that when the gates closed on Thursday evening the fair has already taken in as much money as it had on the whole week of the previous year.

Saturday was "get-away day" at the fair. Something like 4,000 paid admission and the grounds were full of activity up to late hour. The races were, of course the great magnet of the day but the fair had attracted a considerable number of people.

Miss Ripston made her farewell address in good form. The last rule race in the series was the climax of the fair, and the ladies drivers in the sulkeys were all vying for the prize. Miss Violet Bode won, Mrs. Margaret Macdonald was second.

At the trenches the soldiers gave the exhibition, but the midway people folded their tents like the Arabs and as silently (almost) stole away. By night the seemingly permanent tented city had vanished and nothing but poles and supports had stood and the litter and debris of the fair remained to indicate where it had been. It is good bye to the exhibition until 1918.

## ON DIT

That the garden variety of hat is having an unusual vogue in New York this summer.

That one of the latest features among stockinet suits is the long, pleated coat with a vest.

That the best thing now for every man to decide is that there can be no victory without his personal assistance.

That Paris reports that the flare has flared out and far coats for next season will be straight up and down.

That the Chicago Red Cross is organizing a canteen to serve food and coffee to soldiers detaining there or passing through the city on their way to training camps.

## NATIONAL FETE IS CELEBRATED BY ALL FRANCE

### War Report Tells of Minor Operations in Many of the Sectors

Paris, July 14.—France today celebrated its national fete with fervor and joy unknown since the war years. "It is a pity," says Paul Deschanel, president of the chamber of deputies, in a message to the Journal, "that the Germans cannot see our national fete, they who believe us to be starving and at the end of our resources."

"In the month of April, notwithstanding magnificent results, we did not realize our hopes." Since then a noble leader who has had nothing but success in this war, a great infantryman, a wise, upright and clear mind has been put at the head of our army. Already the Russians are fulfilling their pledges and here are the Americans bringing us their powerful support not only in money, airplanes and ships, but in men and guns.

America's intervention, while a decisive verdict on the justice of our cause, is a sure guarantee of victory. It makes it more than ever our duty to hold on.

**Wept and Cheered.**  
Paris wept and cheered at the sight of the battle-torn flags brought from the front and carried through the streets today. With each flag marched thirty men picked from the regiment men who had been through inferno of endurance and assaults most of them recovered from wounds, each of them exceptional among soldiers, brave men for the deed done. The cross swung from ribbons above each flag for they were flags from regiments and battalions which have been decorated in their entirety.

There were extraordinary scenes along every part of the route. Crowds cheered frantically but thousands of men and women too deeply moved to raise their voices, gave way to tears. July 14 is City of Paris day as well as the national holiday and funds were collected for the city's work on behalf of its prisoners of war by sale in the streets of small flags, medals and other souvenirs. Subscribers of a franc received a medal of bronze-like metal with the profile of Washington and Lafayette on one side and the inscription "July 4, 1776—July 14, 1878" on the other.

**Legions Soldiers There.**  
President Poincaré reviewed the troops on the Vincennes field before they began their march. With Major General Pershing, Marshall Joffre, the presidents of both houses of parliament, Premier Ribot and the members of his cabinet and other distinguished persons. Back of the president's party were hundreds of armless or legless soldiers, who were invited in from the crowds to the best places on the stand.

Parisians are accustomed to foreign uniforms, but some of these which they saw today were puzzling. One could see from the reviewing stand American, Japanese, Portuguese, Serbian, Roumanian, French and British soldiers, French colonials from East India and Central Africa, Canadians, Australian, New Zealanders, British soldiers from South Africa, Belgians, Russians and Italians.

## THE WOMEN'S EXCHANGE

In accordance with requests made by a number of readers, The Bulletin has decided to run the questions and answers the same days in future in this column. Instead of as at present, giving the answers on the day following the questions. As in the past all inquiries addressed to this department of the Bulletin will be given the most careful attention.

### TODAY'S INQUIRIES

Can bread be made out of rolled oats? If so, how is it done?  
I think you will find the following recipe satisfactory: Scald two cups rolled oats in three cups boiling water, add one tablespoon salt, one tablespoon lard and one-half cup sugar. After cooling, add a yeast cake, mix in six cups wheat flour, then proceed the same as for ordinary wheat bread.

Is there a recipe for a war cake which has no milk, butter or eggs?  
Two cups brown sugar, two cups white sugar, two tablespoons salt, one packet seedless raisins, one teaspoonful cinnamon, one teaspoonful cloves. Boil all ingredients in water for five minutes, add three cups flour and one teaspoonful baking soda in one teaspoonful hot water. Bake in two loaves for one hour in a slow oven.

What is a good recipe for potted veal?  
One large veal steak, one-half inch thick, two tablespoons butter, salt, pepper and paprika to taste and one onion. Brown the veal on both sides in butter, then take it out of the skillet, mix flour with the butter and add water enough to make a thick gravy. Place meat again in the pan.

### Economical Sweets.

To the Editor of Woman's Page:  
Dear Madam—I have been much interested in your column and am sending you an eggless, butterless and milkless cake recipe which is fine, also two simple but delicious desserts which can be made very quickly when you are pressed for time. The latter make a little getting dinner.

**Yum Yum Cake.**—Two cups granulated sugar, two cups water, one cup lard, one-half pound seedless raisins. Put on stove and boil three minutes. When entirely cold add one teaspoon cake soda, two teaspoons cinnamon, one-half teaspoon salt, three and one-half cups flour. Bake one hour in a moderate oven.

**Chocolate Pudding.**—Take one pint of milk, remove cream and put on fire. Mix one tablespoon cornstarch, three tablespoons sugar and one tablespoon cocoa together, dry, and stir in the hot milk on the stove, stirring all the time. Remove when thick and add one spoon of vanilla. This will serve three or four persons in sherbet glasses. Serve with top milk taken from bottle, or whipped cream. Double the quantity if you wish to serve six persons.

**Apple Slump.**—Pare apples as for apple sauce and put on to stew, with sugar. When partly done drop following into stew: one cup raisins, one cup currants, one cup blueberries, one cup plums, one cup peaches, one cup apricots, one cup cherries, one cup pears, one cup apples, one cup oranges, one cup lemons, one cup limes, one cup grapefruit, one cup pineapple, one cup mangoes, one cup guavas, one cup figs, one cup dates, one cup figs, one cup dates, one cup figs, one cup dates.

**Unusual Sandwiches.**  
To the Editor of Woman's Page:  
Dear Madam—For the girl who wants to serve sandwiches which are a little out of the ordinary here are some suggestions: Spread a slice of thinly buttered bread with chopped olives and a layer of mayonnaise, then place another layer of bread on this, spread with buttered, spread with pounded sardines and mayonnaise, or other slice of bread, pimentos and mayonnaise, another slice of bread, egg yolks and mayonnaise, and top with bread. Place under a weight. With a little practice there will be no difficulty in making these sandwiches daintily.

**Onion and Honey Sandwiches** are delicious. Melt one cup butter, stir in one-half cup honey and three-quarters cup chopped walnuts. Then chill and spread between biscuits or slices of brown bread.

### New England Fish Pie.

To the Editor of Woman's Page:  
Dear Madam—This New England fish pie is delicious: Cut a pound of cod into individual pieces and roll in flour; place in a casserole. Season with salt and pepper, a tablespoon lemon juice and a generous sprinkling of cracker crumbs. Moisten with water and a few dabs of butter and bake about twenty minutes or more, then cover with mashed potatoes and brown in oven.

### She Thinks of Another.

To the Editor of Woman's Page:  
Dear Madam—I am a married woman, about thirty years of age, with one child. I have a good husband, but I am not happy. I feel that I am not doing my duty to my husband, and I am not doing my duty to my child. I feel that I am not doing my duty to myself. I feel that I am not doing my duty to the world. I feel that I am not doing my duty to God. I feel that I am not doing my duty to my soul. I feel that I am not doing my duty to my body. I feel that I am not doing my duty to my mind. I feel that I am not doing my duty to my emotions. I feel that I am not doing my duty to my senses. I feel that I am not doing my duty to my conscience. I feel that I am not doing my duty to my heart. I feel that I am not doing my duty to my lungs. I feel that I am not doing my duty to my stomach. I feel that I am not doing my duty to my intestines. I feel that I am not doing my duty to my bladder. I feel that I am not doing my duty to my rectum. I feel that I am not doing my duty to my anus. I feel that I am not doing my duty to my vagina. ## Behind the Footlights

What the Advance Man Says

**CUNNING TONIGHT**  
AT EMPIRE THEATRE  
Hudson in his "Psychic Phenomena" devotes several chapters to what he terms "mental freaks." Blind Tom, a negro pianist born in slavery, when at the age of five could be placed at the piano and after a person whistled some tune would play it on the piano. Later as he grew up he was able to duplicate the most difficult composition of the great masters. After any piece of music had been played he would be led to the piano and play it precisely as he had heard it, yet he was totally blind and otherwise almost an idiot. Drifting, the lightning calculator, could juggle columns of figures like no learned mathematician, yet being introduced to anyone, he would forget them entirely in five minutes. Cunning, who comes to the Empire this week, as a boy, could be taken into another room blindfolded and tell how many people were in the room, even though some were concealed behind furniture. Since childhood he has devoted his life to

ALL THIS WEEK AT THE MONARCH THEATRE

thought transference and today he stands without a peer in this particular work. In presenting this strange transaction, he makes no claim to any supernatural gift, but merely the harmonious logic of minds. When the steam engine was first tried out in New York state people said it would not run, or if it did, it was the work of the devil. A few years ago when wireless telegraphy was talked about, few people believed it would be a reality. Cunning claims that at some time in the not too distant future people will be able to communicate by thought vibration, and perfect mental harmony. He is sincere in his belief. During his kindle scenes, which he presents as part of his program, he will demonstrate this wonderful occult science. Ask him any question, he will give a correct answer. He is indeed a genius.

**CUNNING, SUPER MIND.**  
AT EMPIRE TONIGHT  
Cunning, the super-mind, makes his initial bow to Edmonton theatre-goers tonight. Surrounded by a company of Modern Wonder Workers he will present two hours of mystery and illusions. The latter part of his performance is devoted to thought transference in which he offers his famous Rima Seance. In this demonstration he goes among the audience and talks with persons as freely as though he had known them for years. Patrons are requested to come prepared to ask him any question. He will give a correct answer. Matinees are to be given Wednesday, Friday and Saturday. None but women will be admitted at the Friday matinee.

## PHOTOPLAYS

Publicity men tell of current attractions on the Screen Local Picture Houses

## "LITTLE MARY" IS PRESENTED IN "THE LITTLE AMERICAN"

Mary Pickford, the darling of the world's movie fans will be seen on the screen at the Monarch theatre all this week in "The Little American," a story of timely interest written especially for the Arcturion by Cecil B. DeMille. In the production of "The Little American," various well known authorities on conditions evidenced across the seas have collaborated with the authors, with the result that even the most minute detail has been pronounced perfect. Again the combined arts of Mary Pickford and Cecil DeMille have linked their talents in the cause of the photoplay, and with a result that is said to be excellent. A few days ago the chief film censor of Chicago, Mayor Fankhauser, the most notorious publicity seeker of all the film censors refused to issue a permit for "The Little American" on the plea that it was "anti-German." The Mayor forgot perhaps that the United States is at war with the Hun, and that Great Britain and France, but he probably wishes now that he had refrained from comments on the question of the suitability of "The Little American" as a motion picture for the excellent reason that the New York and Chicago press have been unable to get a permit for the film to be shown in Illinois subjected to drastic modification.

## 'The Little American'

DIRECTION CECIL B. DEMILLE  
We need hardly say more because you all know what that means in connection with motion pictures. In this latest photo drama of Little Mary's, she is seen as a little American girl striving to help her country and France in the great world conflict. It is a stirring, thrilling, and interesting feature. See America's sweetheart in "The Little American."

MONDAY, JULY 16, 1917.

The Toronto Board of Trade has also gone on record as approving the conscription of men and the exemption of money. The conscription that is, of other men, and the exemption of their own money.

Toronto News: "Sir Robert Borden has torn the strangling hands of the grafter and the middleman from the throat of 'Canada.' Strange, in that event, that Canada never felt the grip of their 'strangling hands' so much as during the years that Sir Robert has been premier.

According to the Toronto Telegram, the provinces which have sent more men to the front than they were asked to send are peopled by "Austro-Germans." If the eastern provinces of Canada were dominated by the same sort of "Austro-German" sentiment there would be no shortage of men for Canada's army, and hence no need of conscription.

The Toronto News thinks "The majority of 63 for the Prime Minister's selective draft measure is a triumph for democracy, for representative government, and for the men at the front." That is so, if democracy triumphs when self-elected members of parliament refuse the people a chance to pronounce judgment upon the most serious question that ever came up for national consideration; if representative government is furthered by suspending the right of popular election and of popular veto upon measures passed by a body of irresponsible lawmakers; and if the men at the front are helped by automatically and unnecessarily steering the country into the added dangers of a rebellion plotted, advertised, propagated and paid for by the political allies of the Ministers of the Crown.

There are some hopeful signs that the Government is giving way before the demand for some sort of effective control of the cost of living in Canada. A food controller has been appointed, and a fuel controller, and the cost of living commission is now letting a small amount of information escape into the newspapers about the way the public has been held up. This information has to do, not with current developments, but with the operations of the profiteers last year. To have prevented the exploitation the investigation should have been made, and the exposure taken place, months ago. Now, after the robbery has been done, investigation and exposure are useful in so far as they point the way to recovery by the State of what was wrongfully taken from its subjects, and as they show the need of effective control to prevent further depredations of the kind. Profiteering is going on now only measurably more than it was a year ago. But the demand that it be stopped is much more general, and much more insistent, than it was a year ago. For the hopeful change in the attitude of the Government toward the subject credit must be given, not to vigilant initiative on the part of the Ministers, but to the manifestation of the fact that the public will not stand for inaction any longer.

Amsterdam sends out a report that the Kaiser has abdicated, and appends a warning that the story had better be taken with reserve. The warning was hardly necessary. Most of the stories that come from Amsterdam are taken with reserve.

An amendment has been accepted altering the classification under the conscription bill, so that single men up to the age of thirty-four will be called out before any married men are conscripted. That is one improvement accomplished by criticism.

Sir Sam Hughes knows, if anybody does, why he slackened recruiting effort at a time when he was entirely certain that he could raise the half million men by voluntary enlistment if allowed to do so. He says he did it because Sir Robert Borden told him to; and says it in language which leaves no possible doubt of his absolute confidence in the correctness of his memory.

The North Alberta branch of the Patriotic Fund have practically decided to increase the grant payable to a soldier's dependents by two dollars per month. The only fault to be found with the increase is that it is not at all in proportion to the increased cost of living, and that, unless it is supplemented by increases in the allowances from the Government, the soldier's family will not be placed in nearly as good position as when the husband and father left, and as he was given to believe would be their position in his absence. But as those in charge of the fund in this district are faced with a deficit for the present year, and are wondering by what means they are to get the money needed for next year, there is no mystery about the fact that the proposed increase is not larger. In view of the situation they are to be credited with courage, and with a right feeling toward the soldiers' dependents, in undertaking to make any increase at all.

An investigator has let out some information as to the money some Canadian packing plants have been making by "food control" during the war. The effect will likely be to whet the public appetite for more figures on the same subject—as well as for certain kinds of food which people used generally to eat but which are now available only to the well-to-do. It is not likely that packers alone have been using the opportunity to hold up the public for all it was worth; it may even be that they are not the worst of the offenders. Having subjected a few of the profiteers to exposure, the Government are now bound in fairness to do likewise to the tribe in general. The knowledge of how much they have been swindled out of by the few may sharpen the public desire to know how much they were really done out of by the whole fraternity.

The automobile parade on Friday was something to be remembered with pleasure. From the spectacular point of view it would probably stand comparison with the motor pageants held in any of the larger cities of the continent, where these are regular features on the programs of holiday celebrations. From the utilitarian standpoint it was a revelation of how the automobile may be adapted to advertising purposes, and of rare skill and enterprise on the part of business firms in making use of the opportunity. The cars decorated with sheaves of grain and other farm products drew well-deserved attention. They helped to visualize in a most attractive and pleasing manner the thing that is making Alberta great—the fertility of its soil. The number of the cars in the parade was also notable. And when it is recollected that there were even more cars on the grounds that were not in the parade than there were in it, the place that the automobile has come to hold in Edmonton and the Edmonton district is strikingly suggested.

**"Know Thyself."**  
A stout baggage-laden old English gentleman was trying to make a hurried exit from a railway carriage. At the door he stumbled on the foot of a brassy bed.  
"Hoots, toots, mon!" growled the Highlander. "Canna ye look whaur y're going? Hoot, mon hoot!"  
The hardened traveler sighed, and the door behind him and shrouded through the window:  
"Hoot yourself! I am a traveler, not an automobile!"—Argonaut.

## A Question of Urgency.

Patriotic urgency is the great reason advanced for the introduction of the military service bill. The Government and its supporters are supposed to be consumed with a desire to rush reinforcements to the aid of the Canadian troops in France, while anyone, especially if he is a Liberal, who questions the terms of the bill or dares to argue as to its principles, is hindering the work of winning the war. The assumption of intense interest on the part of the Government and its supporters got a rude jolt on Friday night of last week. In regulating the proceedings of all deliberative bodies, provision is always made that a quorum must be maintained or business cannot be transacted; that is, where the attendance falls below a certain number, business must stop. In the case of the House of Commons, having 251 members, the quorum is 20. As the Government is responsible for the business of the House, the obligation to keep up a quorum rests upon the Government and its supporters. On Friday night, June 29th, about eleven o'clock, while the debate on conscription was in progress and with a long list of expectant speakers in the hands of the respective whips, when Mr. H. Laurier, a Quebec Liberal, rose to speak, Boulay, a Quebec Conservative or Nationalist, called the attention of the Speaker to the fact that there was no quorum. After all reasonable delay on the part of the Speaker to allow other members to come in, the names of those present were taken down and the Speaker declared the House adjourned. While not in itself important, this incident throws a strong sidelight on the attitude of the Government and its supporters towards the business of Parliament generally, and especially towards the conscription bill. While anxiously claiming credit for the most intense interest in the military activities of Canada, they regard their responsibilities so lightly that they allow the business of the House to be interrupted because they do not give sufficient attention to sit in their places to the number of less than twenty.

## ANSWERS

This department does not pretend to be infallible. It will endeavor, however, to answer questions sent to it by readers of The Bulletin to the best of its ability, reserving the right to ignore all that are trifling or of concern only to the questioner. To receive attention, every inquiry must bear real name and address of the questioner. This information is not wanted for publication, but as an evidence of good faith.

## Divorces in Canada.

To the Bulletin: How can I obtain a divorce? Is it possible that my husband may have obtained a divorce in the United States without my knowing it?  
A SUBSCRIBER.  
Divorces in Canada can only be obtained by an act of Parliament. The cost is usually more than \$1,000. It is quite possible for your husband to obtain a divorce in the United States without your knowing of it.

How to Can Beets.  
To the Bulletin: What is a good method to can beets?  
SUBSCRIBER.

A. Take red beets the size of a teacup or smaller, cook them until done and cut them in quarters. Put the quarters on the stove in a crock and cover with vinegar, add one teaspoon of salt and two spoonfuls of sugar. When well heated can as fruit. Above is for enough beets to fill a 1-quart glass jar.

## No Wealth Conscription.

From the Calgary Albertan.  
There is to be no conscription of wealth. That is certain. If there is need of excessive taxation it will continue to be wrung from the poor man by means of the unfair and iniquitous customs duties. That is what the government has declared.

## The Negro Soldier.

From the Calgary News-Telegram.  
There has been some emulation among the various units of the New York National Guard as to which of the regiments should first reach a war footing, and the contest has finally terminated in favor of the Fifteenth Infantry, made up entirely of negroes and now possessing 2,100 men.

## Things to Hate.

From the Boston Transcript.  
There are indeed some things to

hate in this war and many things to despise. It is our duty, and our emotional duty, to hate the cynicism which first tears up solemnly made treaties and then savages peaceful lands without warrant or excuse, which burns cathedrals and libraries, which massacres old men and women, which murders our own babies, which systematically devotes innocent young girls to a fate worse than death. We will not hate the Germans for these things, but we will hate their warfare, and we will despise apologies for it, no matter from what source they come.

## Weight on the Farmers.

From the Viking News.  
The plow is often spoken of as being emblematic of agriculture or the work of food production. The report of the Dominion department of trade and commerce for the ten months ending January 31st, 1917, which was issued recently, contains some interesting information on "The Plow." During those ten months the farmers of Canada imported \$955,000 worth of

plows, on which they paid the sum of \$191,000 in customs duties and \$75,000 in customs war tax, a total of over a million dollars. During the same time they have paid probably three times that amount in the tariff profits added to the plows which they purchased at home, bringing the total taxation on plows up to the round million. And during the same time the plow manufacturers of Canada imported \$415,000 worth of mould boards, land slides and other parts of plows duty free.

## He Should Get Busy.

From the Winnipeg Telegram.  
Food Controller Hanna should grasp the fact that the people of Canada are expecting him to get busy and show results without delay. They are looking to him for something more than good advice. Definite, positive action is what is wanted. He should issue specific orders and should use the powers of his office to see that these orders are obeyed. There is little use in making

speeches or issuing reports filled with vague suggestions. A recommendation to eat the perishable foods and to conserve the more durable article of diet, is not particularly helpful. It is not specific enough. What is wanted is a clear statement of just what should be done, and when.

If Mr. Hanna thinks wheat should be economized by forbidding the further manufacture of white flour, let them issue instructions accordingly. If he thinks the meat supply ought to be eked out by having one or two pig days per week, let him say so and let him see that the butcher thoroughly underwants it. The people do not want any further eloquent exhortations. Then wait action.

## Saving Worry and Money Through Service

There are many motorists buying Goodyear Tires to-day who base their preference on the assured comfort, appearance, or security these tires lend.

They are the epicures among tire buyers. Their standards are exacting. In Goodyear merits their demands are amply answered.

There is another class of Goodyear users. This class is overwhelmingly in the majority.

Men in this class bring their business instinct into tire purchasing. They measure tire virtues by a far more exacting standard—the capacity for delivering long, loyal, economical service.

It is because these men obtain their due in Goodyear Tires, that they regularly prefer them as their equipment.

For the construction of these tires is a summary of all our tire-building knowledge—the full embodiment of our laborious experience.

In the course of that long experience Goodyear engineers developed the tire-making machine, the No-Hook bead, the All-Weather-tread, the Braided Piano-Wire base, and other quality-giving Goodyear features.

These tires have out-grown experiment. Their goodness is in-built, exact, definite. Their qualities ensure that long, loyal, economical service that the bulk of business-minded motorists demand.

Yes—every Goodyear Tire that reaches the hands of a customer has had the benefit of Goodyear improvements. Its quality is further made sure by a rigid system of inspection. This inspection touches every process of tire-making from the gathering of the raw rubber to the delivery of the finished tires to the shipping room.

In Canada more than 1000 business men, realizing the reliable and economical service yielded by Goodyear Tires, have so organized themselves that they can support and extend this service.

They work beneath the emblem shown above. Their set aim is to make your tire bills smaller, to build their business on your friendship, to win your friendship by deserving it.

Their service embraces many tasks. It is yielded courteously and willingly. It involves doing many things that would take the pleasure out of your motoring if you had them to do yourself. It is a service that saves you worry and money.

You should take advantage of the Goodyear Service Station Dealer's work. It helps you realize what you and every other motorist desires—tire service that is long, reliable and economical.

Go to the Goodyear Service Station Dealer near you. Ask him to describe his work. He will be glad to tell you the many tasks he performs. He will be pleased to demonstrate to you that his service is money-saving, efficient, courteous, complete—that his service is service such as you have been seeking.

## Fast Time in Auto Races on Last Day Edmonton Fair--'Texas' Clark Within Fraction Canadian Record

### In The Big Leagues

Covered Mile in 1:07 3/5—Wins Final Heat Of Free-For-All—Willard Easily Defeats Jewett In Match For \$300—Miss Stinson Makes Successful Farewell Flight.

The much heralded auto races have visited Edmonton, flung their machines round the track a few score times and departed with the close of the exhibition for pastures new, leaving behind several thousand persons in the city and vicinity who for many a day will carry round with them a recollection of thundering exhaust pipes, dense dust clouds and a vision of the grimed drivers steering their machines round the turns at a very evident risk of life and limb.

Another thing the spectators saw: "Texas" George Clark drove his big red Overland a trial mile in 1:07 3/5, the fastest mile ever run on the local track and within the fraction of the Canadian record. The Canadian record, which is 1:07, Clark made the attempt directly after Floyd Willard, in his Krone Henry, had sailed twice round the oval in 1:08 3/5. Texas was mainly in the mood to break up a few of such troublesome things as records and upon completing his first trial gave him Number 5 a once over and vented an opinion that the Edmonton track looked like a winner. When he asked the privilege of attacking the two-fifths of a second overhang from his first mile, the privilege was not only granted, but Fredrick West offered medal if the Canadian record could be shaved. By the time J. Alex Sloan, starter, had announced this trickster and the terms to the grand stand, a diamond or two had become incorporated in the record book and close observers saw President William flinching the jitters in his jeans rather nervously. However, the West record, which was a quit in the record book, remained unshaken as Clark's best time in the equaling trials was respectively 1:08 2/5 and 1:09 1/5. Evidently the last heat of the first mile, which was driven at a terrific pace, had put his engine somewhat out of commission, for in the last race following hard on the heels of the three trials, Texas was unable to keep pace with the other cars. The last race was a plain kind of trouble. One thing was apparent, if Willard in his Ford could hook his speed on the turns to Clark's hair raising pace on the straight, the combination would be a world beater.

Course in Good Shape

Before the start of the afternoon's racing the speed kings entertained a few turns round the course. Mrs. Margaret MacDonald, President of the fair, and others were amongst the group so entertained and all took the test game though looking about as happy meanwhile as a party on the way to execution. The course was a excellent shape for the afternoon but the one somewhat serious obstacle appeared to be a rather bad "jump" when the cars were going over the subway.

The first race of the afternoon was a matched three miles between Chad Jewett and Floyd Willard, which was said to have grown out of a dispute as to which had the faster car. A trophy

was given by the exhibition association and the drivers placed a side bet of \$300. Willard had no difficulty in winning and departed with the close of the exhibition for pastures new, leaving behind several thousand persons in the city and vicinity who for many a day will carry round with them a recollection of thundering exhaust pipes, dense dust clouds and a vision of the grimed drivers steering their machines round the turns at a very evident risk of life and limb.

The Australian pursuit race was exciting enough for the nine laps only to become somewhat of a farce in the last time round when Giroux in his number 5 car most openly eased up to allow Dave Koestla in scratch car number 11 to overlap both Ellingboe and Giroux within testing distance of the tape. The time for Koestla for the five miles was 6:30, with Ellingboe second, Giroux third, and Bob Cline, in white 7, last.

The final heat of the free-for-all was the sensation of the day between George Clark, Fred Morey, Floyd Willard and Chad Jewett, the finish being in the order given. Jewett never had a look-in, but the big racers had the time of their lives keeping away from Willard. The Detroit lad kept the nose of his little stick into the exhaust stream of his rival, experts ahead and only the dare devilry of Clark in hugging the rails on the third lap prevented Willard from doing his famous scissor and pushing him into line. So keen was the fight on the last lap that after leaving the green flag Willard attempted to drive between Clark and Morey, with the result that he only escaped through a miracle from being pinched by the larger racers. Willard protested the decision for this squeeze-out, but in-

as much as the International rules give the leading car the right way, his objection could not be sanctioned. The time for the six laps was 1:18 3/5, the prizes being \$500, \$300 and \$100.

Ben Giroux and Dave Koestla gave another three-mile exhibition of the tire and wheel change and cut down the time to a bone as compared with the day previous, when Koestla did the three laps in 1:13 3/5 and changed wheels in 13 seconds. Saturday Koestla was again the winner with a time of 1:14 for the laps and 14 3/5 seconds for the change. The world's record for the change is 11 seconds.

Giroux staged a spectacular finish in the 3-mile three cornered match race by pulling up on Jules Ellingboe was a tremendous upset on the last quarter, and incidentally plucking the \$300 which went to the winner in the event. Ellingboe held the lead for nine laps and was closely pursued by Koestla until both were down on the verge of success by Ben Giroux in his black bullet. The time was 5:40 1/5 for a flying start.

Event number 5 was the trial mile heat of Willard, and the three attempts at the record by Clark. The \$100 for the car making the fastest time went to Clark.

The farewell number on the racing card was a free-for-all handicap with five cars in the field. Clark being placed scratch with Cline half a lap in advance, followed by Jewett, Willard and Morey. Hervey overhauled the pack in the four laps, Jewett pulling in for second money. Cline was third and Willard fourth, Clark never becoming a factor after his engine died and a hitch in compression and kicked and exploded like a field piece gone wrong. The time for the two miles was 2:20 2/5.

## Sporting Facts and Fancies

The International league and American Association races are very much more interesting than those of the National and American leagues. The former seems to be much more ginger in the former than in the latter.

If Larry Doyle gets that chance to be manager of a certain National league club which has its habit in the smoky City, look out for some spectacular playing by the whole blooming Larry ought to be able to train players to work as he does—that is, to catch balls standing on their ears. Larry can do it and he just loves to show off his tricks to the fans.

Poor old Larry Doyle! It isn't so long ago that he was doing handstands on the diamond and catching the ball between his teeth. And now the Cubs want to get rid of him because he can no longer keep the pace. Well, there's nothing like growing old gracefully, Larry.

Eddie Collins holds the record for playing in consecutive games. Up to a short time ago he had performed in 31 straight games and by this time is nearing the four hundred mark.

Batteries of artillery at the front in France will regret that Hank Gowdy won't become a soldier until the fall. But the Braves won't be glad to call upon him to operate in connection with the batteries on the diamond. Hank, after enlisting, has returned for the season to his team mates. In the fall he will put on Uncle Sam's uniform and take up drilling with a gun.

Christy Mathewson has been wooing out a lot of players whom he can't use just at present. Bob Boesch and Fred Smith went to the minors recently and others are likely to follow.

Today in Pugilistic Annals

1900—Frank Erne and "Terrible Terry" McGovern fought their memorable featherweight championship battle in Madison Square Garden, New York. McGovern won by a knockout in the third round. Erne had agreed to knock out Terry within ten rounds or lose the decision. Instead of that, he was knocked out like a field piece.

1901—Joe Gans defeated Dal Hawkins in three rounds in New York. Gans and Hawkins fought three of the most terrific ring battles in history. In the first meeting Hawkins, who was a Californian, won the decision. In the second battle, after both men had been knocked down several times, Gans scored a knockout in the second round.

COBB FAILS TO MAKE RECORD BUT STILL HEADS ALL RIVALS; SAFELY IN FRONT WITH .375

Chicago, July 14—With an average of .325, George Sisler, the youthful first-base star with St. Louis, has batted his way to second place in the American league, according to unofficial figures. He is ahead of Cleveland's Cleveland, forced into third place, in trailing two points behind Sisler.

Although failing in his attempt to break his record for consecutive hitting, Cobb is safely out in front with .375.

Thrown temporarily off his batting stride, due to a sprained thumb, Sisler picked up remarkably in his last eight games. He drove out 17 hits, five of them triples and three doubles, and boosted his average fifteen points.

Cobb's speed in running bases has given him the scoring honors. The Georgian has crossed the plate 52 times in 77 games. He also leads in total base hitting, having driven in 109 hits for 188 bases. Twenty of his blows were doubles, 13 triples and three home runs.

Roth, his team-mate, for the leading base-stealing with a total of 27. He also increased his lead in sacrifice hits to 41, piped New York's Sox, with six circuit drives, is showing the way to the home run hitters. Detroit maintained its lead in team batting with an average of .244. Its averages include games of Wednesday.
